

## Web Application Development using ASP.Net

### Project 1: Diagnostic Center Bill Management System

This web application will manage billing activities for a small diagnostic center. Generally, small diagnostic offers several types of tests like *Complete blood count, Lipid profile, Urine C/S-200, X-Ray LS Spine, USG Lower abdomen* etc. Since bill processing for these types of tests requires paper work and is very error prone, we are offering this application to process it automatically from their side. Following are the stories (with score) for the mentioned application. Note that, you can't change any specification described below.

#### Feature List & Score

Sl #	Feature	Score
1	Test Type Setup	3
2	Test Setup	3
3	Test Request Entry	8
4	Payment	4
5	Test wise report	4
6	Type wise report	4
7	Unpaid bill report	4
Total		30

### 3. Test Request Entry

When a patient comes for some tests, user of the diagnostics will enter all tests information for this patient. When 'Add' button will be clicked, entered information will be displayed in grid. Finally, when user will click 'Save', all information will be saved in database and a PDF will be opened which contain unique bill number and print date.

#### 4. Payment

User of this UI will use it when patient comes to pay for the bill. User will enter *Bill No* or *mobile number* and click *Search* button, *Total amount* and *due date* against this bill no will be displayed. After that user will take amount from patient and click *Pay* button to update bill payment status.

The image shows a payment UI form with a title bar labeled "Payment". The form is divided into two main sections. The top section contains two input fields: "Bill No" and "Mobile No", separated by an "Or" label. A "Search" button is located to the right of the "Mobile No" field. The bottom section contains two input fields: "Amount" and "Due Date", with a "Pay" button to the right of the "Due Date" field. The form is surrounded by a grid of light blue circles, with two circles in the first column, two in the second, and three in each of the third, fourth, and fifth columns.

## 5. Test wise report

User will select *from* and *to date* and click *show* button, *test name*, *total number of tests* and *total amount* will be displayed. If any test has no test request for selected dates between, these will also be displayed with their number of test and total amount will be zero.
